

Restricted single-channel assembly, dimer

face twist tolerance $\delta = 5^\circ$ (costs face $4.97 k_B T$ against tip), $\phi = 0.01$

- Experimental range
- Transient aggregation (experiment)
- face-to-face only
- tip-to-tip only
- $T_B = 250$ K (free above, blocked below)
- other manifold, continued for comparison
- face-to-face, bound pairs only
- tip-to-tip, bound pairs only
- $E_{vdW}^{face,pair}$
- $k_B T = 1$
