

Restricted single-channel assembly, dimer
face twist tolerance $\delta = 10^\circ$ (costs face $3.58\,k_B T$ against tip), $\phi = 0.01$

- Experimental range
- Transient aggregation (experiment)
- face-to-face only
- tip-to-tip only
- $T_B = 250\text{ K}$ (free above, blocked below)
- other manifold, continued for comparison
- face-to-face, bound pairs only
- tip-to-tip, bound pairs only
- $E_{vdW}^{face, pair}$
- $k_B T = 1$
