

Restricted single-channel assembly, superlattice  
face twist tolerance  $\delta = 10^\circ$  (costs face  $3.58 k_B T$  against tip),  $\phi = 0.01$

- Experimental range
- Transient aggregation (experiment)
- face-to-face only
- tip-to-tip only
- $T_B = 250$  K (free above, blocked below)
- other manifold, continued for comparison
- face-to-face, bound pairs only
- tip-to-tip, bound pairs only
- $E_{vdW}^{face, pair}$
- $k_B T = 1$
